## WHY DO WE RECOMMEND ZEISS ANTI-REFLECTION COATINGS?

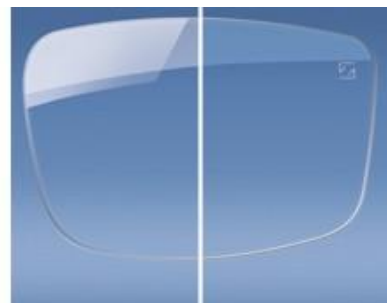

**Robust** - Zeiss lenses with new Duravision platinum anti-reflection coating are three times harder than the previous generation Zeiss coating for plastic lenses..

**Dirt-resistant** - an anti-static layer means that dust and dirt is not attracted to the lens surface so lenses stay cleaner for longer.

**Very easy to clean** – the coated lens surface resists oil and liquids more effectively, so that smudges from fingermarks and skin contact, or water splashes, just don't stick.

**Anti-reflective properties** –the new blue reflex colour increases the light passing through the lens, resulting in even better vision. Duravision can increase the brightness of your lenses by up to 20% compared with your previous coating.

\*\*\*\*\*WINTER OFFERS ON ANTI-REFLECTION LENSES\*\*\*\*\*

£50 OFF SELECTED FRAMES INCLUDING DESIGNER BRANDS WHEN YOU PURCHASE ZEISS REFLECTION FREE LENSES

FREE LENS-CRAFT® FRAME WITH YOUR ZEISS COATED LENSES
